Assistat Engineer: Eric Leibing

- Cover artwork by Markus Reinbold

- Layout Claus "Oimel" Larcher

ALBUM INFO

This new Album brings in pure raw classic heavy metal, just as the band has loved and celebrated it all their lives. No unnecessary adding to modern metal styles, that's what other bands do enough.

It's not a concept album.

Each song stands for itself.

The music is the same tradition as Motörhead, Saxon and similar bands.

Mot old-fashioned, but simply timeless and honest.

In contrast to previous albums, I (singer Thomas) have only processed my own experiences and things that are close to my heart.

Each song is based on an actual event or a deeply felt desire. For example, the song "Bloodline" an anti-war song. It's an appeal to stop all this war crap.

In my opinion, the best lyrics I have ever written.

The only song without a real backstory is "Demolator". It's about an evil monster that destroys everything.

But somehow that's also why this song kind of belongs to me.

After we decided to christen the band again, our guitarist Jürgen Föry and I started writing new songs for it.

All songs are thus by Jürgen Föry and Thomas Zeller.

After everything worked out well, also with Massacre Records behind, the songwriting will take place in the future with the whole band.

It couldn't be better from the schedule. After all we're celebrating our 40th anniversary in 2026.

The reason for the reunion were the many fans who tirelessly asked us to do so and of course our own pure desire to continue writing the chapter.

Everything still works just like it used to be, but sounds more mature, more thoughtful and intelligent. It would be bad if it wasn't for that.

The sound is also successful and much better than the old productions.

We used to work mostly with people who came from a different genre of music.
